ELSEVIER

International Journal of Mass Spectrometry 241 (2005) 327–330

International Journal of Mass Spectrometry

www.elsevier.com/locate/ijms

Subject index Volume 241

Ab initio
Proton migration and its effect on the MS fragmentation of *N*-acetyl OMe proline: MS/MS experiments and ab initio and density functional calculations, 315
Ab initio calculations
The dissociation energy of $Cl_2O_2^+$, 133
Ab initio molecular dynamics
On the amphiphilic behavior of the hydrated proton: an ab initio molecular dynamics study, 197
Adduct ion
Using electrospray ionization-mass spectrometry/tandem mass spectrometry and small molecules to study guanidinium–anion interactions, 11
ADMP
On the amphiphilic behavior of the hydrated proton: an ab initio molecular dynamics study, 197
Alcohol
Ion/molecule reactions of 2-chloro- and 2-bromopropene radical cations with methanol and ethanol—FT-ICR spectrometry and DFT calculations, 31
Aliphatic alcohols
An experimental study of ligand exchange and bond insertion in the reactions of dimanganese carbonyl ions with alcohols in the gas phase, 63
Alkali metal ions
Influence of methylation on the properties of uracil and its noncovalent interactions with alkali metal ions. Threshold collision-induced dissociation and theoretical studies, 225
Alkene
Binding interactions of mono- and diatomic silver cations with small alkenes: experiment and theory, 109
Alkene radical cation
Ion/molecule reactions of 2-chloro- and 2-bromopropene radical cations with methanol and ethanol—FT-ICR spectrometry and DFT calculations, 31
Alkylethynyl radicals and anions
The alkylethynyl radicals, $^{\bullet}C{\equiv}C{-}C_nH_{2n+1}$ (n=1–4), and their anions, 295
Ammonia
Ammonia activation by iron: state-specific reactions of $Fe^+(^6D, ^4F)$ with ND_3 and the reaction of $FeNH^+$ with D_2, 243
Amphiphilicity
On the amphiphilic behavior of the hydrated proton: an ab initio molecular dynamics study, 197
Atom-centered density matrix propagation
On the amphiphilic behavior of the hydrated proton: an ab initio molecular dynamics study, 197
Atomic and molecular ion
A novel approach for the determination of 238Pu by thermal ionization mass spectrometry (TIMS) using interfering element correction methodology, 83

Binding energy
The unimolecular C_2 fragmentation of C_{82}: a computational study, 261
Bond dissociation energies
Binding interactions of mono- and diatomic silver cations with small alkenes: experiment and theory, 109
The dissociation energy of $Cl_2O_2^+$, 133
Influence of methylation on the properties of uracil and its noncovalent interactions with alkali metal ions. Threshold collision-induced dissociation and theoretical studies, 225
Bond energies
Ammonia activation by iron: state-specific reactions of $Fe^+(^6D, ^4F)$ with ND_3 and the reaction of $FeNH^+$ with D_2, 243
Bond insertion
An experimental study of ligand exchange and bond insertion in the reactions of dimanganese carbonyl ions with alcohols in the gas phase, 63

C_{82} fullerenes
The unimolecular C_2 fragmentation of C_{82}: a computational study, 261
$C_8H_{10}^+$
Thermal decomposition of ethylbenzene cations ($C_8H_{10}^+$): experiments and modeling of falloff curves, 305
Charge transfer
Experimental and theoretical studies of charge transfer and hydride transfer in the reactions of OD^+ and C_2H_4, 271
Cluster ions
A theoretical study of trivalent lanthanide ion microsolvation in water clusters from first principles, 283
Clusters
Photodissociation of M^+(benzene)$_x$ complexes (M = Ti, V, Ni) at 355 nm, 165
Coincidental ion yield
Multiple secondary ion emission from keV massive gold projectile impacts, 57
Collision-induced dissociation
The dissociation energy of $Cl_2O_2^+$, 133
Influence of methylation on the properties of uracil and its noncovalent interactions with alkali metal ions. Threshold collision-induced dissociation and theoretical studies, 225
Computational chemistry
Bond strengths in $POCl_3^-$, $POCl_2^{\bullet-}$, and $PSCl_2^-$, 75
Coordination structure
A theoretical study of trivalent lanthanide ion microsolvation in water clusters from first principles, 283
Coulomb explosion
Femtosecond laser-induced dissociative ionization and Coulomb explosion of ethanol, 25
Cyclopentanone
An experimental and computational study of the ions formed by the reaction of cyclopentanone with $O^{\bullet-}$, 149

Density function, *N*-acety OMe proline
Proton migration and its effect on the MS fragmentation of *N*-acetyl OMe proline: MS/MS experiments and ab initio and density functional calculations, 315
Density functional theory
Binding interactions of mono- and diatomic silver cations with small alkenes: experiment and theory, 109

doi:10.1016/S1387-3806(05)00023-0

An experimental and computational study of the ions formed by the reaction of cyclopentanone with $O^{\bullet -}$, 149
Desorption ionization on oxidized silicon
Polyatomicity and kinetic energy effects on surface polymerization by ion-assisted deposition, 139
Desorption ionization on porous silicon (DIOS)
Quantitative analysis of polypropyleneglycol mixtures by desorption/ionization on porous silicon mass spectrometry, 43
DFT calculation
Ion/molecule reactions of 2-chloro- and 2-bromopropene radical cations with methanol and ethanol—FT-ICR spectrometry and DFT calculations, 31
The unimolecular C_2 fragmentation of C_{82}: a computational study, 261
Didehydro radical anion
An experimental and computational study of the ions formed by the reaction of cyclopentanone with $O^{\bullet -}$, 149
Dimanganese carbonyl ions
An experimental study of ligand exchange and bond insertion in the reactions of dimanganese carbonyl ions with alcohols in the gas phase, 63
Dissociation reaction
Dissociation reactions of diatomic silver cations with small alkenes: experiment and theory, 99

Electron affinity
An experimental and computational study of the ions formed by the reaction of cyclopentanone with $O^{\bullet -}$, 149
The alkylethynyl radicals, $^{\bullet}C{\equiv}C{-}C_nH_{2n+1}$ (n=1–4), and their anions, 295
Electron capture
Bond strengths in $POCl_3^-$, $POCl_2^-$, and $PSCl_2^-$, 75
Electron promotion
Gas-phase reactions of atomic lanthanide cations with methyl fluoride: periodicities reactivity, 189
Electrospray
Using electrospray ionization-mass spectrometry/tandem mass spectrometry and small molecules to study guanidinium–anion interactions, 11
Elimination
Ion/molecule reactions of 2-chloro- and 2-bromopropene radical cations with methanol and ethanol—FT-ICR spectrometry and DFT calculations, 31
Ethanol
Femtosecond laser-induced dissociative ionization and Coulomb explosion of ethanol, 25

Falloff curves
Thermal decomposition of ethylbenzene cations ($C_8H_{10}^+$): experiments and modeling of falloff curves, 305
F-atom transfer
Gas-phase reactions of atomic lanthanide cations with methyl fluoride: periodicities reactivity, 189
Femtosecond laser
Femtosecond laser-induced dissociative ionization and Coulomb explosion of ethanol, 25
Flowing afterglow
The dissociation energy of $Cl_2O_2^+$, 133
Fourier transform ion cyclotron resonance
An experimental study of ligand exchange and bond insertion in the reactions of dimanganese carbonyl ions with alcohols in the gas phase, 63
Fragmentation energy
The unimolecular C_2 fragmentation of C_{82}: a computational study, 261
Free-electron laser (FEL)
Matrix-assisted laser desorption/ionization of protein samples containing a denaturant at high concentration using a mid-infrared free-electron laser (MIR-FEL), 49

FT-ICR
Ion/molecule reactions of 2-chloro- and 2-bromopropene radical cations with methanol and ethanol—FT-ICR spectrometry and DFT calculations, 31

Gold projectile impacts
Multiple secondary ion emission from keV massive gold projectile impacts, 57
Guanidinium
Using electrospray ionization-mass spectrometry/tandem mass spectrometry and small molecules to study guanidinium–anion interactions, 11
Guided ion beam
Influence of methylation on the properties of uracil and its noncovalent interactions with alkali metal ions. Threshold collision-induced dissociation and theoretical studies, 225
Ammonia activation by iron: state-specific reactions of $Fe^+(^6D, ^4F)$ with ND_3 and the reaction of $FeNH^+$ with D_2, 243

Heater
Aerosol particle mass spectrometry with low photon energy laser ionization, 89
Higher-order fields
Geometry optimization for the cylindrical ion trap: field calculations, simulations and experiments, 119
Hydrophobicity
On the amphiphilic behavior of the hydrated proton: an ab initio molecular dynamics study, 197

Infrared
Matrix-assisted laser desorption/ionization of protein samples containing a denaturant at high concentration using a mid-infrared free-electron laser (MIR-FEL), 49
Insoluble protein
Matrix-assisted laser desorption/ionization of protein samples containing a denaturant at high concentration using a mid-infrared free-electron laser (MIR-FEL), 49
Intersystem crossing
Experimental and theoretical studies of charge transfer and hydride transfer in the reactions of OD^+ and C_2H_4, 271
Ion deposition
Polyatomicity and kinetic energy effects on surface polymerization by ion-assisted deposition, 139
Ion trap mass spectrometer
Geometry optimization for the cylindrical ion trap: field calculations, simulations and experiments, 119
Ion trap simulation
Geometry optimization for the cylindrical ion trap: field calculations, simulations and experiments, 119
Ion-assisted deposition
Polyatomicity and kinetic energy effects on surface polymerization by ion-assisted deposition, 139
Ion-molecule
Temperature dependence of the oxide ion/ozone reaction in the gas phase, 185
Ion–molecule reaction
Ion/molecule reactions of 2-chloro- and 2-bromopropene radical cations with methanol and ethanol—FT-ICR spectrometry and DFT calculations, 31
Experimental and theoretical studies of charge transfer and hydride transfer in the reactions of OD^+ and C_2H_4, 271
Ion–molecule reaction dynamics
Dynamical control of 'statistical' ion–molecule reactions, 173
Iron
Ammonia activation by iron: state-specific reactions of $Fe^+(^6D, ^4F)$ with ND_3 and the reaction of $FeNH^+$ with D_2, 243

Isobaric interference
A novel approach for the determination of 238Pu by thermal ionization mass spectrometry (TIMS) using interfering element correction methodology, 83
Isotope ratio
Wide dispersion multiple collector isotope ratio mass spectrometer, 1

Kinetics
Temperature dependence of the oxide ion/ozone reaction in the gas phase, 185

Lanthanide
A theoretical study of trivalent lanthanide ion microsolvation in water clusters from first principles, 283
Lanthanide cations
Gas-phase reactions of atomic lanthanide cations with methyl fluoride: periodicities reactivity, 189
Laser
Aerosol particle mass spectrometry with low photon energy laser ionization, 89
Ligand exchange
An experimental study of ligand exchange and bond insertion in the reactions of dimanganese carbonyl ions with alcohols in the gas phase, 63

Magnetic sector mass spectrometer
Wide dispersion multiple collector isotope ratio mass spectrometer, 1
Mass dispersion
Wide dispersion multiple collector isotope ratio mass spectrometer, 1
Matrix-assisted laser desorption/ionization (MALDI)
Quantitative analysis of polypropyleneglycol mixtures by desorption/ionization on porous silicon mass spectrometry, 43
Matrix-assisted laser desorption/ionization of protein samples containing a denaturant at high concentration using a mid-infrared free-electron laser (MIR-FEL), 49
Methyl fluoride
Gas-phase reactions of atomic lanthanide cations with methyl fluoride: periodicities reactivity, 189
Model potentials
A theoretical study of trivalent lanthanide ion microsolvation in water clusters from first principles, 283
Modified nucleobases
Influence of methylation on the properties of uracil and its noncovalent interactions with alkali metal ions. Threshold collision-induced dissociation and theoretical studies, 225
Molecular modeling
The unimolecular C_2 fragmentation of C_{82}: a computational study, 261
Monte Carlo simulations
A theoretical study of trivalent lanthanide ion microsolvation in water clusters from first principles, 283
MS/MS
Proton migration and its effect on the MS fragmentation of *N*-acetyl OMe proline: MS/MS experiments and ab initio and density functional calculations, 315
Multiple collector
Wide dispersion multiple collector isotope ratio mass spectrometer, 1

Noncovalent interaction
Using electrospray ionization-mass spectrometry/tandem mass spectrometry and small molecules to study guanidinium–anion interactions, 11
Non-linear resonance
Geometry optimization for the cylindrical ion trap: field calculations, simulations and experiments, 119

Oleic acid
Aerosol particle mass spectrometry with low photon energy laser ionization, 89
Organometallic ions
Photodissociation of M^+(benzene)$_x$ complexes (M = Ti, V, Ni) at 355 nm, 165
Oxidation
Ion/molecule reactions of 2-chloro- and 2-bromopropene radical cations with methanol and ethanol—FT-ICR spectrometry and DFT calculations, 31
Oxoanion
Using electrospray ionization-mass spectrometry/tandem mass spectrometry and small molecules to study guanidinium–anion interactions, 11
Ozone
Temperature dependence of the oxide ion/ozone reaction in the gas phase, 185

Peptide fragmentation
Proton migration and its effect on the MS fragmentation of *N*-acetyl OMe proline: MS/MS experiments and ab initio and density functional calculations, 315
Polymer mixture
Quantitative analysis of polypropyleneglycol mixtures by desorption/ionization on porous silicon mass spectrometry, 43
Polythiophene
Polyatomicity and kinetic energy effects on surface polymerization by ion-assisted deposition, 139
Potential energy surface
Thermochemistry and structures of solvated S_N2 complexes and transition states in the gas phase: experiment and theory, 205
Experimental and theoretical studies of charge transfer and hydride transfer in the reactions of OD^+ and C_2H_4, 271
Precursor complex
Dynamical control of 'statistical' ion–molecule reactions, 173
Proton affinity
An experimental and computational study of the ions formed by the reaction of cyclopentanone with $O^{\bullet -}$, 149
Protonated water clusters
On the amphiphilic behavior of the hydrated proton: an ab initio molecular dynamics study, 197
^{238}Pu
A novel approach for the determination of 238Pu by thermal ionization mass spectrometry (TIMS) using interfering element correction methodology, 83

Quantitative analysis
Quantitative analysis of polypropyleneglycol mixtures by desorption/ionization on porous silicon mass spectrometry, 43

Radical ions
Bond strengths in $POCl_3^-$, $POCl_2^-$, and $PSCl_2^-$, 75
RDFM
Aerosol particle mass spectrometry with low photon energy laser ionization, 89
Reaction dynamics
Experimental and theoretical studies of charge transfer and hydride transfer in the reactions of OD^+ and C_2H_4, 271
Reaction mechanism
Ion/molecule reactions of 2-chloro- and 2-bromopropene radical cations with methanol and ethanol—FT-ICR spectrometry and DFT calculations, 31

Secondary ion emission
Multiple secondary ion emission from keV massive gold projectile impacts, 57
Silver cation clusters
Dissociation reactions of diatomic silver cations with small alkenes: experiment and theory, 99
Silver cations
Binding interactions of mono- and diatomic silver cations with small alkenes: experiment and theory, 109

Small alkene
Dissociation reactions of diatomic silver cations with small alkenes: experiment and theory, 99
Small molecule
Using electrospray ionization-mass spectrometry/tandem mass spectrometry and small molecules to study guanidinium–anion interactions, 11
S_N2 reaction
Thermochemistry and structures of solvated S_N2 complexes and transition states in the gas phase: experiment and theory, 205
State-specific chemistry
Ammonia activation by iron: state-specific reactions of $Fe^+(^6D, ^4F)$ with ND_3 and the reaction of $FeNH^+$ with D_2, 243
Structure
Thermochemistry and structures of solvated S_N2 complexes and transition states in the gas phase: experiment and theory, 205
Substitution
Ion/molecule reactions of 2-chloro- and 2-bromopropene radical cations with methanol and ethanol—FT-ICR spectrometry and DFT calculations, 31
Surface polymerization
Polyatomicity and kinetic energy effects on surface polymerization by ion-assisted deposition, 139

Thermal decomposition
Thermal decomposition of ethylbenzene cations ($C_8H_{10}^+$): experiments and modeling of falloff curves, 305
Thermal ionization
Wide dispersion multiple collector isotope ratio mass spectrometer, 1
Thermal ionization mass spectrometry
A novel approach for the determination of 238Pu by thermal ionization mass spectrometry (TIMS) using interfering element correction methodology, 83
Thermochemistry
Bond strengths in $POCl_3^-$, $POCl_2^-$, and $PSCl_2^-$, 75
Thermochemistry and structures of solvated S_N2 complexes and transition states in the gas phase: experiment and theory, 205
Ammonia activation by iron: state-specific reactions of $Fe^+(^6D, ^4F)$ with ND_3 and the reaction of $FeNH^+$ with D_2, 243
Thermodynamics
A theoretical study of trivalent lanthanide ion microsolvation in water clusters from first principles, 283
Time-of-flight mass spectrometry (TOFMS)
Matrix-assisted laser desorption/ionization of protein samples containing a denaturant at high concentration using a mid-infrared free-electron laser (MIR-FEL), 49
Time-of-flight mass spectrum
Femtosecond laser-induced dissociative ionization and Coulomb explosion of ethanol, 25
Transition states
Thermochemistry and structures of solvated S_N2 complexes and transition states in the gas phase: experiment and theory, 205
Turbulent ion flow tube
Thermal decomposition of ethylbenzene cations ($C_8H_{10}^+$): experiments and modeling of falloff curves, 305

Vibrational effects
Dynamical control of 'statistical' ion–molecule reactions, 173
Vibrational frequencies
The alkylethynyl radicals, $^\bullet C{\equiv}C{-}C_nH_{2n+1}$ (n=1−4), and their anions, 295

Yield distributions
Multiple secondary ion emission from keV massive gold projectile impacts, 57
